Description

Scope is a compact cylinder of handcrafted glass, that demonstrates contemporary sensibilities. Our Olive/Frost glass is a colored transparent borosilicate glass, with a frosting carefully applied to conceal the light source. The light brownish glow has an edgy display that exudes an energetic mood, while the frost glows brightly from the lamping. When lit this gives off a light that is functional and vibrant. This handcrafted glass uses a process where every glass is consistently produced using an extrusion, keeping variations to a minimum.

Lamping LAMPING
