Description

Our Keno begins with clear blown glass, with a bull-nosed shape and glossy outer finish. We then, using a handcrafting technique, carefully apply a band of actual fine-grained sand to the inner surface of the glass, where the colour is fully saturated into the coating for a bold statement. A final clear protective coating is applied to seal and preserve the accent material. The result is a beautifully textured work of art, comfortable with the irony of sand being applied to a glass that originates from sand. When illuminated, the colors shimmer through the noticeable refractions created by every granule, as the sand patterning is obvious and pleasing.
